RESPONSIBILITIES

- In Infosys I have worked for a automobile dept. client as a **React and Spring Full-Stack Developer.** In their internal application used for car pricing and configuration which works in different phases in the supply chain.
- I implemented different batch Job and UI Screen for generating report which helped client to reduce workflow also validate and process data correctly.
- Also handled junior team members to support them in their work.

PROJECTS I HAVE WORKED ON

Relaxation App

- A music player app that uses local storage music files to play music.
- It has extensive features like : explore songs by album, use of playlist, background play.
- You can check the demo: **https://github.com/psubhajit14/relaxation-app**

GPRAC

- A web application that is created for local people to get acknowledgement
- It supports **PWA**, **RazorPay Payment Integration**. **Firebase Authentication, Cloud store**,
- **Multiple Language support (English & Bengali)**
- Technology used: **React JS, Firebase. Typescript, Node, Express JS, RazorPay API, Ant Design**
- You can check the website: **https://grpac-mern-grpac.vercel.app/**
- You can check the repository: https://github.com/psubhajit14/grpac_mern/
